Art Unit: 1711

1. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Firstly, within component b), it is improper to specify the functionality of the polyol as being 1.

Secondly, within component d), the language, "with having", is confusing. Clarification is required.

Thirdly, within component f), "esters" should be "ester".

Fourthly, within component h), it is unclear what constitutes "conventional" additives. What characteristics determine if the additive is conventional, and how does the "conventional" further limit the additives?

Lastly, claim 4 is indefinite, because the method fails to recite a positive or definitive process step.
